

CONTRACT BETWEEN THE UNITED STATES RECLAMATION SERVICE  
AND LAKE SHORE IRRIGATION COMPANY  
FOR THE CARRIAGE AND DELIVERY OF WATER TO WATER RIGHT APPLICANTS  
October 12, 1914.

Article 8. The Lake Shore Canal Company may divert from the flow of Spanish Fork River such an amount of water as it is entitled to under the decree of the Fourth Judicial District Court of Utah, dated April 20th, 1899, rendered by Judge W. M. McCarty, and subsequent appropriation through prescriptive and decreed rights, the total of said amount of water not to exceed 60 second-feet; and the Lake Shore Canal Company, so far as its rights and interests are concerned, will permit the United States to take all other water in Spanish Fork River without interference.

Article 9. The United States shall be entitled to divert from Spanish Fork River, by reason of the release of the stored water of the Strawberry Valley project, the total amount so released, less losses, as estimated from year to year by the United States in carrying the said water from the Strawberry tunnel outlet to the headworks of the Lake Shore canal, and to the other points of diversion from Spanish Fork River into the various canals using such water. In case of dispute as to the correctness of such estimates, the decision of the Chief Engineer of the U. S. Reclamation Service shall be binding on the parties hereto.

IN WITNESS WHEREOF, The parties have hereto signed their  
names the day and year first above written.

LAKE SHORE IRRIGATION COMPANY
